

Dental implant technology offers New Smile in a Day

Has fear kept you or a loved one from visiting the dentist?
Have you lost the hope that you could ever have the youthful smile you once had?

For many patients, fear has led to neglect and an overwhelming breakdown of their oral health.

Moreover, if you have several missing teeth, are in pain, have difficulty chewing, are embarrassed to smile or are unsatisfied with your denture, New Smiles is here to help. The innovative "New Smile in a day" procedure brings hope back and allows us to restore your smile in one procedure.

Quality dental implants feel and function like natural teeth and are the standard in permanent tooth replacement.

"New Smile in a day" means just that: You will walk away with entirely functioning, long-lasting teeth. After a comprehensive exam and thorough planning (all done in-office), our doctors use the most advanced technology and training to restore your smile. You do not need to visit multiple doctors, multiple times.

At New Smiles, our doctors are available to discuss all of your options and costs, then design a plan with you that will bring back confidence and health comfortably in an efficient, timely manner.

The "New Smile in a day" approach has proven that when you change your smile, you change your life.
